## Provider Search

CalCPA Health utilizes the Anthem Blue Cross provider network with more than 53,000 doctors and more than 430 hospitals throughout California. Three out of every four eligible physicians in California participate in the Anthem Blue Cross network. You also have access to the Blue Cross network nation-wide.

Choosing an Anthem network provider lowers your out-of-pocket medical costs. You may choose any provider but benefits levels are significantly lower when using a non-network provider and non-network providers may seek additional payments directly from you for amounts not covered by your health plan.

CalCPA Health utilizes the Delta Dental provider network. Using a network dentist can save you a significant amount on your dental costs.
