 - ✓ Respiratory Infection
 - ✓ Sinus & Nasal Conditions
 - ✓ Sore Throat
 - ✓ Stomach Virus
 - ✓ Urinary Tract Infection
 - ✓ Vomiting

“Seeing” a doctor can be easy.

You can call or click a button to talk to a doctor, it’s that easy.

Step 1: Register and request

Quickly create an account, complete a brief medical history online to describe your symptoms and request a consultation.

Step 2: The doctor will see you now

A 24/7 Call-A-Doc physician will review your health record and current complaint then contact you via telephone or online video (per your request). They will listen carefully to your complaint, review your symptoms and ask questions, just like a visit to the doctor’s office, but the doctor comes to you.

Step 3: Time for treatment

After carefully reviewing all information given, your doctor will prescribe a treatment plan. Some treatment plans may involve over-the-counter medications or a prescription. If a prescription is necessary, it will be sent to a local pharmacy of your choice.

Step 4: Follow up

Follow up by reviewing the notes your physician makes in your medical record, following the advice provided, and picking up your prescription, if needed. You can even listen to a recording of the conversation, which is made part of your medical record.

We’ll follow up to make sure that your treatment plan worked and you are happy with our service.
